PROFESSIONAL SUMMARY

Dynamic Python Developer with expertise in Full-Stack web development and Gen AI solutions, focused on building user-centric solutions and enhancing user experiences. Proven ability to leverage analytical and technical skills to collaborate effectively with teams, deliver impactful projects, solve complex problems, and drive results.

TECHNICAL SKILLS

- **AI / ML:** Generative AI, Machine Learning, LangChain, RAG pipelines, Model Fine-tuning, LLMs.
- **Languages & Database:** Python, JavaScript, HTML5, CSS, MySQL, MongoDB.
- **Frameworks:** React.js, Node.js, Flask, FastAPI, CrewAI, Tailwind CSS, Bootstrap.
- **Data Science:** NumPy, Pandas, Matplotlib, PyTorch, TensorFlow (Keras).
- **Cloud & Tools:** Microsoft Azure, Google Cloud, GitHub, Google Colab, VS Code, Hugging Face.

EDUCATION

B.Tech — AI & Data Science | Mahakal Institute of Technology, Ujjain | RGPV | May 2026 | **CGPA: 7.52**

Higher Secondary (12th) | Macro Vision Academy, Burhanpur | CBSE | 2022 | **73.66%**

High School (10th) | New Vision Hr. Sec. School, Burhanpur | MP Board | 2020 | **93.00%**

PROFESSIONAL EXPERIENCE

Wipro Limited – 2x AI Intern | Bengaluru 29/07/2025 – 28/08/2025 & 03/03/2026 – 30/04/2026 (3 months)

- Worked on GenAI and Azure FinOps projects using Python, LangChain, RAG pipelines and Agentic AI frameworks; also designed an Anomaly Detection [Architecture](#) for Azure Cloud to identify irregular patterns in cloud resource usage.

JobSense Institute – Web Developer/Designer Intern | Ujjain 11/08/2023 – 25/08/2023 (2 weeks)

- Designed and built responsive, dynamic web pages using HTML5, CSS, and JavaScript, demonstrating excellent performance throughout the internship.

PROJECTS

NSE Stock Predictor | [\[Readme\]](#) | [\[Link\]](#)

- A predictive AI-based intelligent stock forecasting tool that leverages machine learning techniques and technical indicators to predict the next day's stock prices with Avg. accuracy of 85-90%.

SAP VM SKU Recommender | [\[Readme\]](#) | [\[Link\]](#)

- A GenAI-powered RAG model built with LangChain that simplifies complex SKU recommendations for SAP workloads, making it easier for sales and presales teams to choose the correct VM for execution.
